

THREE-MONTH SEASONAL CLIMATE OUTLOOK STATEMENT

Page 2

Temperature probabilities for Winter 2003, issued 15th May 2003

Little signal in Tasmanian Winter temperature odds

The Bureau's winter temperature outlook shows the odds for a warmer than average season are better than 50:50 over the entire country for both daytime and nighttime temperatures. The strongest swings in the odds are over the west and north of Australia.

For the **June to August** period in Tasmania though, there is little signal in the odds with the chances of above average *seasonal daytime temperatures* being mainly between 50 and 55%, except for some eastern areas where they rise a little over 55% (see *Figure 1*). These probabilities have resulted from higher than average sea temperatures in the tropical Indian and western tropical Pacific Oceans.

So with climate patterns like the current, about 5 winters out of every 10 are expected to be warmer than average across Tasmania, with about 5 out of 10 being cooler. The Bureau's winter maximum temperature outlooks have low reliability over the State (see *background on page 1*).

The chances of above average *seasonal minimum temperatures* are between 50 and 55% across Tasmania (see *Figure 2*) and minimum temperature outlooks for winter have low reliability over the State.

Background Information:

- These outlooks are for the average maximum and minimum temperatures for the entire outlook period. Information about whether individual days or weeks may be unusually hot or cold, is unavailable.
- This outlook uses data from both the Pacific and Indian Oceans. The Pacific has been cooling but remains warm in the west, whilst the Indian is warmer than average over large areas.
- This outlook represents a summary: more detail is available from the contact people or web site listed below. Answers to Frequently Asked Questions (FAQs) are shown on page 3.

Fig.1: Chance that max temps averaged over winter will be above median (warmer)

Fig.2: Chance that min temps averaged over winter will be above median (warmer)

The national text, with colour maps, is also on the WEB at http://www.bom.gov.au/climate/ahead/temps_ahead.shtml.

More information on this outlook is available from 9:00am to 5:00pm (EST) Monday to Friday by contacting the Climate and Consultancy section in the Bureau's Hobart Office: (03) 6221 2043.
